

HOW DOES SHRINERS HELP KIDS BE KIDS?

Love to the Rescue.

Shriners Hospitals are committed to caring for special pediatric conditions and injuries. Alongside Shriners foundation in orthopaedics, Shriners is a pioneer in the world of burn care, cleft lip and palate reconstruction and spinal cord injuries.

Customized Care.

Since 1922, Shriners has been at the forefront of treating a wide variety of orthopaedic conditions. Doctors, nurses, researchers and therapists provide the customized care a child needs.

Cost Free.

Shriners never turns away a child, no matter the financial situation of the parents. Donations from people like you make this lifesaving care possible for millions of children.

Fun.

How can a hospital be fun? Shriners provides fun rehabilitative classes and activities as well as just fun things to do during a hospital stay. From art to movie nights to character visits, children will feel supported and loved.

**HOW TO SEND
YOUR LOVE.**

WITHOUT SHRINERS...

Across social media, former Shriners patients reflect on how Shriners has made a difference. By supporting your local hospital, Shriners can continue to provide life changing care.

HOW YOU CAN HELP CHILDREN REACH THEIR POTENTIAL:

DONATE FUNDS

Monetary gifts are welcomed to continue providing the best orthopaedic care for children in the country. Donors like you ensure all children can have a bright future. Donate via phone, (800) 241- 4438, or you can donate online at shrinershospitalalforchildren.com.

DONATE TIME

Volunteers are always welcomed at your local Shriners Hospitals for Children. Contact your nearest Shriners about volunteering with a group or as an individual.

DONATE TREASURES

It's possible to donate non-monetary gifts such as toys, blankets, books stuffed animals, movies... anything kids love! Contact Shriners to find out what is in need at your local hospital.

DONATE TODAY FOR A BRIGHT FUTURE FOR ALL CHILDREN.

RESCUE A FUTURE

"In my mind, cerebral palsy was a disability that wouldn't get any better, and that this was only going to get worse. We didn't think we had options until Shriners Hospitals for Children came into our lives."

Olivia Stamp's mother lost hope when her only daughter was diagnosed with cerebral palsy. After a friend introduced her to Shriners, her daughter Olivia was on her way to being a active and healthy child through rehabilitation and surgery.

With Shriners, "the future is whatever she wants it to be, whatever she chooses to do." Olivia and her mother both have hope for a bright and happy future.

I was a long time patient at Shriners in LA. I spent many months as an inpatient while receiving treatment for my legs. My favorite class was art and stamp collecting. Ty Shriners. You changed my life.

i_am_thehydra

My favorite day was when we went to "rec"! I painted so much while I was at Shriners, learned to play pool, and played Atari!

busybeeofthree

I am forever impressed and humbled by the amazing things that Shriners does and their patients!

maddy.h16

The same type of thing with me! I had orthopedic surgery at 9 and again when I was 11, I still go to Shriners every year for follow up appts. These past 8 years of Shriners care has been amazing, and I now want to be an orthopedic surgeon for shriners! Thank you Shriners!
